Supply Textile Detergent and Oil Drilling Grade

CMC/Sodium Carboxymethyl Cellulose

Basic Info.

CAS No.: 9004-32-4

Formula: $C_8H_{16}NaO_8$

EINECS: 618-378-6

Transport Package: 25 Kg/Ba, Metal

Color: White Appearance Powder

HS Code: 39123100

Certification: ISO

Port: Qingdao, China

Used

Carboxymethyl Cellulose CMC is an anionic water soluble polymer based on renewable cellulosic raw material. It functions as rheology modifier, retains water and is an excellent film former. These attributes make it a preferred choice as a bio-based hydro-colloid in multiple applications.

1. CMC is used in paper industry for binding the ingredients, and for increasing the strength of paper. Some purified and technical grades are also used for smoothing the surface of paper, which means better printability and quality.
2. CMC can be used with plaster and cement. The main objective is to prevent early freezing; that way, it becomes quite easy to work on plaster in a longer period.

Company information

Xiamen Ditai Chemicals Co., Ltd is a professional chemical company in China. Specializing in and exporting various kinds of quality chemicals since 1997. The products include industry chemical, Animal feed additive, Food additive, Agrochemical, Fertilizer, pharmaceuticals, water treatment and Minerals. Our management team has over 17 years of combined expertise meeting the

needs of clients. We are proud our quality chemicals and service was approved by the clients in the worldwide.
